ATHERIUM

www.atherium.co
www.atherium.net

BACKGROUND

The purpose of establishing Atherium is to facilitate payment transactions, facilitate the blockchain ecosystem, and provide benefits to its users.

Atherium was founded by a team that is experienced and dedicated in the development of blockchain technology. This team consists of financial experts, software developers, marketing experts, and prominent figures in the world of blockchain technology. In creating Atherium, the team wanted to provide an easy-to-use solution to assist users in making payment transactions and sending funds, as well as providing profitable benefits for token holders.

Atherium is present as an innovation in blockchain technology. By using Binance Smart Chain (BSC) technology, Atherium allows users to make transactions with low fees and fast. Apart from that, Atherium also offers high security and innovative features.

BACKGROUND

Atherium is also committed to providing lucrative benefits to its token holders. Apart from providing benefits from rising token prices, Atherium also offers opportunities for token holders to get bonuses and other prizes through investment, affiliate, staking, farming and so on.

However, Atherium also pays attention to the risks involved in using blockchain technology and various applicable rules and regulations. Therefore, Atherium advises its users to always do research and be careful when making transactions and using blockchain technology.

Atherium also emphasizes that this whitepaper is for information only and is not a solicitation to make an investment or transaction. Users are expected to conduct research and consultation before making investments or transactions using blockchain technology and the Atherium token.

ATHERIUM

TECHNOLOGY

ATHERIUM USES THE BINANCE SMART CHAIN (BSC) NETWORK (BEP20)

Binance Smart Chain (BSC) is a blockchain network developed by Binance, one of the largest crypto exchanges in the world. BSC uses BEP20 technology (Binance Smart Chain Token Standard), which allows users to create tokens that can be used on the BSC network. BEP20 is one of the standard ERC20 (Ethereum Request for Comments) tokens customized for use on the Binance Smart Chain network.

TECHNOLOGY

ATHERIUM USES THE BINANCE SMART CHAIN (BSC) NETWORK (BEP20)

Binance Smart Chain (BSC) is a blockchain network developed by Binance, one of the largest crypto exchanges in the world. BSC uses BEP20 technology (Binance Smart Chain Token Standard), which allows users to create tokens that can be used on the BSC network. BEP20 is one of the standard ERC20 (Ethereum Request for Comments) tokens customized for use on the Binance Smart Chain network.

In addition, BEP20 also supports cross-chain, meaning that BEP20 tokens can be transferred to other blockchain networks that support ERC20 tokens such as Ethereum. This allows users to utilize their BEP20 tokens for various purposes such as trading, payments, and use in decentralized applications.

Due to its low transaction fees, fast transaction speed, and cross-chain support, BEP20 is becoming a popular choice for creating crypto tokens and building blockchain applications on top of the Binance Smart Chain network.

ATHERIUM ROADMAP 2024

Q1

Staking Platform development (Cefi System with affiliate bonus 3 level). Listing at Pancakeswap.

Q3

Request listing at CMC & Coin Gecko. Update logo on Trust Wallet.

Q2

Farming Platform development Web3 (Defi System with affiliate bonus). Listing at Cex Exchange.

Q4

Update Logo at Trust Wallet. Prepare development another ecosystem. Prepare New Roadmap 2025
